

# GarageBand Project - Guitar

iPad-4

## Student assignment

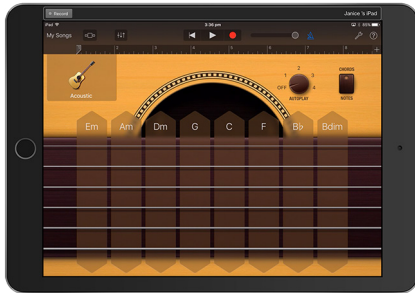

*Aim: To create musical guitar parts and chord progressions.*

*You need: iPad with GarageBand app (any version).*

*Resource video: [https://youtu.be/Mk-vEsoO\\_xE](https://youtu.be/Mk-vEsoO_xE)*

### Task A:

Record an 8-bar guitar part using manual strumming and just the chords: C, F and G.

- Start with a previously created smart drums track, and delete the bass track.
- Make sure the chords or notes switch is set to chords.
- Use manual strumming, You can either strum the strings downwards or press where the letter of the chord is written.

Student achievement

### Task B:

Record a guitar part using the autoplay feature using the following chord progression:

| C | | | G | | | C | | | G | | |

- Move the autoplay dial to remove the strings, and then experiment until you find a pattern you like.
- Try the different guitars, and notice that the autoplay patterns for each guitar are different.
- You can also experiment with the effect buttons to vary the sound.

Student achievement

### Task C:

Record a guitar part using the autoplay feature using the chords C, F and G in any order, but with no more than one chord per bar. Then write down your chord progression below.

- Choose a guitar part and strumming pattern first.
- Keep to one chord per bar.
- Begin and end with C, as this is the **tonic chord** of the key, and makes the listener feel like the music has completed.

Student achievement

My chord progression:

--	--	--	--	--	--	--	--	--
